STATEMENT

Highland Wireless Services, LLC has not established operating procedures that ensure compliance with the Federal Communication Commission ("Commission") regulations regarding the protection of customer proprietary network information ("CPNI") for the following reasons.

- We are an operator of UHF LTR two-way radio trunking systems licensed to us by the Commission in the Private Mobile Radio Service (PMRS) as a FB6 and FB8 operator.
- We are not interconnected to any public switched network nor offer any voice of Internet protocol ("VoIP") services on our own systems nor are we associated with any company who is interconnected and as such do not collect any CPNI data so have no way of violating any CPNI rules as we understand them. We offer only two-way radio voice dispatch services to our customers who are equipped with two-way mobile and portable radios with no telephone interconnect capability.
- Thus we do not believe that we should be required to establish or maintain operating procedures that insure compliance with the Commissions regulations regarding the protection of customer CPNI data since we do not have access to this data.

Please let us know if you require any additional information.
